

Library Development Internship – Summer 2019

Description of internship:

The library development group at X-Chem Pharmaceuticals is looking for a motivated student who is interested in helping develop new technologies for drug discovery. The internship position will offer hands-on experience in the field of DNA-encoded libraries and give the candidate an opportunity to develop chemistries that could be incorporated into X-Chem's industry leading platform.

The internship position within the library development group will mainly focus on the chemistry development of a new 2-cycle library utilizing a Suzuki reaction and reductive amination. In addition, there will be opportunities to develop building block conversion chemistries as well as assessing DNA compatibility of a variety of new reagents.

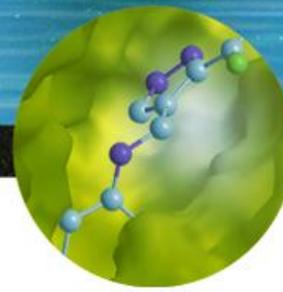

Required skills/experience:

Undergraduate student currently working towards a degree in Chemistry or related field. Completion of at least one Organic Chemistry course and lab is preferred.

About X-Chem

X-Chem is a privately held biotechnology company whose mission is to apply its innovative drug discovery capabilities to the discovery of compounds against novel therapeutic targets.

Our chemical strategy can be applied broadly to most targets in any therapeutic area, including the most challenging ones. We have built a strong team of leading experts with proven track records in innovative drug discovery and biotechnology partnering.

EEO Statement

X-Chem is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions, or any other characteristic protected by law.

Job Code: RFINT01

X-Chem partners with Mass Life Sciences in support of the MLS Internship Challenge. Please check www.masslifesciences.com to see if you qualify. If so, please post your resume there also.
