

Position: Research Associate – High-Throughput Chemistry

Description:

X-Chem is seeking candidates for a Research Associate position in its Discovery Chemistry group. Candidates should have a BS or MS in Chemistry or a related subject, as well as 1-4 years of laboratory experience in industrial or academic settings.

Qualifications:

- A track record of success in organic synthesis, particularly in the areas of reaction optimization or library synthesis.
- Working familiarity with LCMS is highly valuable.
- Knowledge of basic molecular biology techniques is desired but not required.

Job responsibilities will include:

- High throughput reaction validation
- creation of SOPs
- reaction optimization
- library design and synthesis for DNA-encoded-libraries (DELs)

X-Chem operates an industry leading DEL platform with a collegial and team-oriented culture. Scientists who are ready for an innovative and challenging work environment are encouraged to apply.

About X-Chem:

X-Chem is a privately held biotechnology company whose mission is to apply its innovative drug discovery capabilities to the discovery of compounds against novel therapeutic targets. X-Chem offers a stimulating, casual, and fun working environment; plus a competitive salary and benefits package, stock option incentives, and the opportunity for all employees to grow with the Company. X-Chem is an equal opportunity employer that complies with all applicable national, state and local laws governing nondiscrimination in employment as well as employment eligibility verification requirements of the Immigration and Nationality Act. All applicants must have authorization to work in the United States. No Employment Agencies please, the Company is not responsible for any fees related to candidates that are unsolicited.
